Dear Colleagues,

This DVC(R) Bulletin #68 provides an update on important issues affecting researchers at UNSW. If you missed the previous bulletins – the contents are available at http://research.unsw.edu.au/deputy-vice-chancellor-research-bulletin.

In this Issue:

1. The Electron Microscope Unit (EMU) Open Day – 24 September 2014
2. Fully Acknowledging the Source of External Research Funding
3. Research Ethics & Integrity Professional Development
4. Do you know… Research Data Must Be Made Available if Requested
5. Subscribing to the Research Bulletin

1. The Electron Microscope Unit (EMU) Open Day – 24 September 2014

The Electron Microscope Unit (Part of the Mark Wainwright Analytical Centre) is holding an Open Day:

   **When:** September 24, between 11am and 2pm  
   **Location:** Basement of the Chemical Sciences Building.

The EMU is a central research infrastructure unit that provides microscopy and analysis facilities to the research community of the University as well as providing microscopy for a range of external organisations.

The Open Day will showcase our instruments and microscopy techniques that will assist in analysing samples for research projects. We will be open to all academics, researchers and students who would like to explore the possibilities that electron microscopy can provide. Staff will be giving demonstrations on some of the microscopes and will be available to discuss the potential experiments, techniques and results that can be obtained.

Refreshments will be provided, although these need to be kept away from the microscopes! If you are planning to visit, please also remember that you will need to wear closed footwear whilst in the facility.

We look forward to welcoming you.

2. Fully Acknowledging the Source of External Research Funding

It is important that recipients of externally awarded research funding appropriately acknowledge the support and financial contribution of the relevant Sponsor(s).

Many research sponsors have a stipulated requirement for public acknowledgement as a condition for providing research funding. This requirement extends not only to publications but also includes media releases, brochures, reports, website, banners, invitations, logos, speeches, presentations, etc.
In addition to each of the Scheme specific funding agreements, the ARC has information related to acceptable forms for acknowledgement on their website. The NHMRC sets out its expectations in the Funding Agreement (clause 20) available on their website.

For other Sponsors, check the relevant funding agreement or ask the Grants Management Office on mygrants.gmo@unsw.edu.au.

3. Research Ethics & Integrity Professional Development

Are you interested in providing research ethics and integrity professional training for your School or Faculty staff and students?

The Research Ethics and Compliance Support (RECS) Team can tailor and provide local workshops and seminars to meet your needs. To enquire please contact the RECS Team at humanethics@unsw.edu.au or phone 9385 6222 or 9385 57257.

4. Do you know... Research Data Must Be Made Available if Requested

Research Data underpinning research outputs must be made available if it is requested. This is in line with ARC/NHMRC open access policies and international and national trends where publishers now routinely require research data be made available when submitting manuscripts for publishing, subject to confidentiality, contractual and intellectual property provisions.

The handling of research data at UNSW is to be in accordance with the UNSW Procedure for Handling Research Material & Data, a procedure forming part of the UNSW Research Code of Conduct – states:

7.1. Data related to publications must be available for discussion with other researchers. Where confidentiality provisions apply (for example, where the researchers or the institution have given undertakings to third parties, such as the subjects of the research), it is desirable for data to be kept in a way such that reference to them by third parties can occur without breaching such confidentiality.

5. Subscribing to the Research Bulletin

To subscribe to the Research Bulletin please go to dvc-research-bulletin-subscribe@lists.unsw.edu.au.

For any questions please direct them to David Do (david.do@unsw.edu.au or x52784).

Professor Les Field
Vice-President and Deputy Vice-Chancellor (Research)
