All applications from UNSW staff & students must be submitted via the Grants Management Office (GMO). The internal deadline for submission of grant applications to the GMO is **2 weeks prior to the external deadline**. This timeframe allows the GMO to ensure applications comply with UNSW policies and sponsor requirements.

New grant opportunities are also posted on the Current Funding Opportunities Page as they become available.

**NEW:** CSIRO | Postgraduate Scholarships
Opportunities in science and engineering for graduates at Australian tertiary institutions. The program supports postgraduate scholarships for students to work on a project relevant to one of several priority research areas. Postgraduate students who partner with CSIRO to complete their PhD studies will gain access to first-class facilities and have a unique opportunity to work alongside Australia's leading research scientists ...more

**External Deadline:** 31 October 2017

**NEW:** PLuS Alliance Seed Grants 2017
Seed grant funding is available to develop multi-disciplinary or inter-disciplinary research projects across the PLuS Alliance universities (Arizona State University, King's College London, UNSW). Funding applications can be bilateral or trilateral and all researchers based at these universities are eligible to apply. Projects must address one or more of the core PLuS Alliance themes (sustainability, global health, social justice, technology and innovation). A project with team members from each of the PLuS Alliance universities could potentially receive funding of up to US$21,000, UK£15,000 or A$27,000. The first stage of the funding process is an Expression of Interest, after which successful applicants will be invited to submit a full proposal ...more

**External Deadline (EOI):** 1 November 2017

**NEW:** Australian Diabetes Society | Servier Diabetes Research Grants in Memory of Barry Young
Grant proposals must involve improvement of patient care and be consistent with the following national diabetes priorities:
- Reduce the prevalence and incidence of people developing type 2 diabetes.
- Promote earlier detection of diabetes.
- Reduce the occurrence of diabetes-related complications and improve quality of life among people with diabetes.
- Reduce the impact of diabetes in Aboriginal and Torres Strait Islander peoples and other high risk groups.
- Strengthen prevention and care through research, evidence and data ...

For eligibility the Principal Investigator must be a financial member of the ADS for a least one year at the time of application ...more

**External Deadline:** 10 November 2017

**NEW:** Department of Industry, Innovation and Science | Women in STEM and Entrepreneurship
The Women in STEM and Entrepreneurship Program was announced as part of the Inspiring all Australians in Digital Literacy and STEM element of the National Innovation and Science Agenda. The program provides funding to support women in STEM and to eliminate barriers for women’s participation in STEM education and careers, including entrepreneurship. The program supports
projects that foster girls’ and women’s interest in STEM and entrepreneurship, develop their scientific and entrepreneurial knowledge and skills, build their professional networks, or other activities consistent with the program’s objectives. The program also provides funding to identify and celebrate STEM role models in science and research, entrepreneurship and corporate leadership to inspire school-age girls ...

**External Deadline:** 15 November 2017

**NEW:** Cancer Australia | Supporting People with Cancer
The Supporting People with Cancer initiative aims to reduce the burden of cancer through the provision of grants to community organisations; and encourage effective partnerships between organisations in order to improve coordination, accessibility and development of quality cancer support networks to better support people affected by cancer. Applicants can apply for grants of up to $120,000 over a three year period ...

**External Deadline:** 16 November 2017

**NEW:** Medical Device Commercialisation Training Program | Ignition CORE flagship course
Ignition CORE is a 12-week course that guides clinicians and researchers through the complexities of translating their technology from bench-top to market with guidance from over 30 mentors and domain experts leading in industry. The program is designed to accelerate commercialisation of medical technologies in NSW to bring lifesaving healthcare innovations to patients, hospitals and governments around the world. The program offers opportunities for NSW-based medical device technologists to build knowledge, skills and network needed to successfully commercialise medical device technologies ...

**External Deadline:** 22 November 2017

**NEW:** Department of Foreign Affairs and Trade | Stronger Systems for Health Security
The Australian Government, through DFAT, is implementing a call for health systems and/or policy research in relation to health security, entitled Stronger Systems for Health Security. The objectives of the research call are;

- To support high quality and collaborative health systems and/or policy research that contributes evidence to strengthen regional health security, in particular in Southeast Asia and the Pacific.
- To promote translation of that research into health policy and/or practice in the region.
- To increase the capacity and expertise of research institutions in the region in health systems and/or policy research related to health security.
- To contribute to the growth of Australian researchers’ experience of, and expertise in, health security issues in the region, for the benefit of Australia and the region ...

**External Deadline:** 6 December 2017

**INTERNATIONAL:**

**NEW:** British Academy | Anti-Corruption Evidence Programme
The British Academy is inviting proposals from researchers to develop interdisciplinary projects which enhance the development of more effective policies and interventions aimed at reducing corruption in developing countries. This call is for research projects which address one or more of the following four themes:

- International architecture and beneficial ownership
- Commodity trading and potential responses
- Promoting integrity and systems of integrity management in the public and private sectors
- Corruption at different levels

The geographic focus for the research will be on Department for International Development Tier 1
countries where corruption is a constraint and where a better understanding is needed of what kinds of intervention can make a difference. Countries of specific interest are Bangladesh, Ethiopia, Ghana, Kenya, Malawi, Mozambique, Nepal, Nigeria, Rwanda, Tanzania, Uganda and Zambia ...

**External Deadline:** 15 November 2017

**NEW:** National Science Foundation (US) | Call for Input
The National Science Foundation (US) is seeking input on areas that are suitable for international network-network collaboration. Topics should hold the potential to accelerate discovery and advance research outcomes, with science, engineering, and/or STEM education as the focus. Researchers considering submitting an idea should work with a US collaborator to submit a joint idea with the US partner as the lead. Please kindly note that this is not a call for research proposals. Rather, it is an information-gathering effort to inform of the potential need for a future program or program emphasis, which could include building stronger collaborations between the US and Australia. Submissions cannot be made directly from an overseas institution but must be made through a US institution ...

**External Deadline:** 30 November 2017

**Closing Soon:**
- Department of Agriculture and Water Resources | Science Innovation Awards
  External Deadline: 13 October 2017 ...
- Campus Travel | Travel Grant Series – Women in STEM
  External Deadline: 20 October 2017 ...
- National Energy Resources Australia | Project Fund
  External Deadline: 20 October 2017 ...
- Fondation Fyssen | Research Grants (FR)
  External Deadline: 25 October 2017 ...
- Australian Society of Medical Imaging & Radiation Therapy | Research Scholarships
  External Deadline: 27 October 2017 ...
