The Research Foundation of Cerebral Palsy Alliance may support one Early Career Fellowship in the areas of biomedical, clinical or population health, in partnership with the NHMRC. This Fellowship can be an overseas or Australian fellowship. The Research Foundation of Cerebral Palsy Alliance offers a range of grants to support research into the prevention and cure of cerebral palsy. More information can be gained about the research priorities on their website: https://research.cerebralpalsy.org.au/our-work/our-researcher-program/research-priorities/

The successful applicant will have a demonstrated commitment to and a track record in, cerebral palsy research. In the case of a part-time Health Professional award, the Clinical or Health Professional practice component must be relevant to cerebral palsy or related conditions.

The Research Foundation of Cerebral Palsy Alliance may call upon the successful candidate to provide assistance with publicity, education and other events. It also requires acknowledgment of its support for the research in any publications or media publicity, and requires a copy of any published articles arising from the supported research. The successful candidates’ work may be mentioned in publications from the Research Foundation of Cerebral Palsy Alliance. Successful candidates may also have the opportunity to acquire research leadership experience through voluntary involvement at Cerebral Palsy Alliance.
JDRF Australia, in partnership with the NHMRC is offering to co-fund NHMRC Early Career Fellowships for research relevant to JDRF’s mission – the treatment, prevention and cure of type 1 diabetes and its complications.

JDRF aims to support promising health and medical researchers early in their careers and give these future leaders the opportunity to establish themselves in the field of type 1 diabetes research. The successful candidate will have a demonstrated commitment to clinical or translational research focused on type 1 diabetes or type 1 diabetes complications.

JDRF requires acknowledgment in any publications or media publicity relating to the supported research, and requires a copy of any published articles arising from the supported research. Annual progress reports and financial acquittals will be required. JDRF may call upon fellows to provide assistance with publicity and other events. Co-funded fellowships may have additional conditions in relation to funding administered by JDRF.
The mission of Multiple Sclerosis Research Australia is to accelerate Australian research into multiple sclerosis (MS) toward the prevention, better treatments and a cure for MS.

MS Research Australia welcomes applications for top-up funding of up to $30,000 per year for a maximum of four years to successful applicants to the NHMRC Early Career Fellowship and Career Development Fellowship. Up to two awards may be awarded per year. Recipients of the MS Research Australia NHMRC Fellowship Award will be outstanding early career researchers with a demonstrated commitment and track record in MS research in the areas of biomedical, clinical or allied health research. They will be focused on increasing our understanding of the causes, symptoms or management of MS. The award is intended to be used for salary top up.

Candidates who are considered fundable but are unsuccessful in obtaining NHMRC funding will also be considered. In this case the NHMRC/MS Research Australia Fellowship award will be up to $80,000 per annum for 3 years.

To be considered for co-funding, applicants must ALSO submit an application to MS Research Australia. Additional information, including conditions of funding, application form and MS Research Australia closing dates can be found at http://www.msra.org.au/annual-funding-opportunities

MS Research Australia requires acknowledgment of its support for the research in any publications or media publicity, and requires a copy of any published articles arising from the supported research. MS Research Australia may call upon Fellows to provide assistance with publicity and other events.
The National Heart Foundation of Australia is offering to co-fund Early Career Fellowships in the areas of biomedical, clinical, public health or health services research, in partnership with the National Health and Medical Research Council (NHMRC). Applicants must have a commitment to and a track record in research on cardiovascular disease or related disorders.

To be eligible for this co-funded award, applicants must submit a separate application for a Heart Foundation Postdoctoral Fellowship. Applicants must be successful in their application for both a Heart Foundation Postdoctoral Fellowship, awarded through the Heart Foundation peer review process, and an NHMRC Early Career Fellowship, awarded through the NHMRC peer review process.

Please note that the Heart Foundation does not currently offer overseas fellowships and will be unable to co-fund fellowships with an overseas component.

The successful Fellow(s) may be required to provide yearly updates on their work to the Heart Foundation.

Please note that the Heart Foundation requires that individuals, research groups or research institutions associated with this award must not accept any research grant funds, consultancies or sponsorship from the tobacco industry or any person connected with the tobacco industry.

The Heart Foundation may call upon Fellows to provide assistance with peer review, publicity and other events related to their research. Fellows must acknowledge the Heart Foundation support for their research in any publications or media publicity, and provide a copy of any published articles arising from the supported research.
