SHERPA / RoMEO advice

For Functional Ecology:

✅ Author can archive submitted version (i.e. pre-refereeing).
✅ Author can archive accepted version (i.e. final draft post-refereeing), subject to the following restrictions:
  - 12 months embargo for scientific, technical and medicine titles
  - 2 years embargo for humanities and social science titles
❌ Author cannot archive publisher's version / PDF.

Paid access: OnlineOpen - A paid open access option is available for this journal.

Scival: Analyse enriched Scopus data

Overview
Get a high-level overview of the research performance of your institution, other institutions, countries and groups of researchers.

Collaboration
Explore the collaboration network of both your institution and other institutions.

Benchmarks
Compare and benchmark your institution to other institutions, researchers and groups of researchers using a variety of metrics.

Trends
Get the current scientific trends to determine a new research strategy, find collaboration opportunities and rising stars.

About the research data management plan

The Research Data Management Plan (RDMP) allows you to record information about a research project and the data associated with it. It is good practice to create an RDMP at the beginning of a project as it prompts you to consider important elements of a research project, as summarised below.

The RDMP is a living document which can be updated as the project progresses.

You will need to complete an RDMP to obtain storage in the UNSW Data Archive.

Required information checklist:

- Project title
- Project affiliation, Faculty or School
- Project contact details
- Project personnel
- Project description
- Project Field of Research subject code(s)
- HREC or HREA Panel approval number and expiry date (if available)
- Human or animal research subjects
- Personal information conditions
- Arrangements or conditions for data privacy, confidentiality and culturally sensitive information
- Intellectual property and copyright conditions
- Third party and pre-existing data conditions or arrangements
- Types of data generated
- Non-digital data information
- Software and hardware used
